## ➤ **What's our business domain**

Tripadvisor is a company that provides online travel research to assist consumers in creating and taking the best possible vacation.

## ➤ **Kind of dataset**

The European restaurants on TripAdvisor which is relevant to the food and travel industry. We chose this because food is one of the most essential elements for survival and progress in our lives.

## ➤ **Benefits of our analysis**

- Help in business growth
- Promote an international travel
- Promote sales at individual restaurants
- Create decision-making for individual customer

## **Target Users**

### **Company/Business/ Organization**

The analysis could assist the relevant business figure out how to increase sales and what aspects of consumer feedback, both positive and negative, need to be improved.

### **Individual Customer**

These customers would use our analysis in a variety of ways, including decision-making, review, and recommendation.

# **Objectives**

- 
- 1 To make decision-thinking for choosing restaurant of customers**
  - 2 To develop the restaurant to be able to own weaknesses or things that need to be improved.**
  - 3 To promote the international traveling for customers whom lived in both Thailand and other countries**

# **The question that can be answered**

Regarding the type of target users, we provided the following visualization to suit them. Each visualization could be assisted the target users in order to receive more information.

The visualization can be answered the question as following:

- 
- 1** What are the top 10 restaurants with the highest rating in each country?
  - 2** How do you know if a restaurant is rated well?
  - 3** What kind of vegetarian restaurants are there and how good is each one?
  - 4** How do I know the location of the restaurant?
  - 5** Comparison of restaurants including countries in each section

## **Data Description**

We provided the data description from the TripAdvisor statistics for European eateries that we discovered on Kaggle.

This dataset includes a CSV file with 42 columns and around 1.9 million eateries. The examples of data descriptions following:

**restaurant\_link**  
**restaurant\_name**  
**original\_location**  
**Country**

**region**  
**latitude**  
**longitude**  
**awarded**

kaggle

The slide features a light gray background with a subtle gradient. On the left and right sides, there are large, solid blue geometric shapes that resemble stylized arrows or chevrons pointing towards the center. The text is centered between these shapes.
